

Na'Shayla McIntosh

Southern Pines, NC 28387 | nashayla041@icloud.com | 1 910 528 0247

PROFESSIONAL SUMMARY

I am a Motivated Computer Science student at Winston-Salem State University with hands-on experience in Java, Python, and MySQL. Passionate about solving problems and contributing to meaningful projects. Committed to continuous learning and growth in the tech field, with a strong work ethic and a drive to succeed in collaborative and fast-paced environments.

EDUCATION

Winston-Salem State University
Bachelor of Science in Computer Science

Winston-Salem, NC
August 2022 – Present

SKILLS/PROFICIENCIES

Leadership and teamwork in fast-paced, collaborative environments | Strong time management and organizational abilities | Effective communication and interpersonal skills | Academic excellence with dual enrollment and college credits | Java | Python | MySQL | GitHub | VS Code

PROJECTS

AI Grocery Budget Assistant (Hackathon Project)

- Collaborated with a team designing an AI-powered grocery budgeting assistant to help users manage expenses and make data-driven purchasing decisions.
- Built features including budget tracking, smart grocery lists, price comparison, and spending alerts.
- Designed AI-driven functionality to recommend cheaper alternatives, generate budget-friendly meal plans, and analyze user spending patterns.
- Proposed a scalable solution deployable as a web/mobile application with integration for local stores (Walmart, Aldi, Food Lion).
- Utilized GitHub for version control and team collaboration.

ACTIVITIES & PROFESSIONAL DEVELOPMENT

- Participated in a collaborative Hackathon, working with a team to design and develop a software solution using GitHub and agile teamwork practices.
- Presented research titled “Artificial Intelligence and the Expanding Digital Divide” at the ADMI Symposium 2026 (Poster Presentation).
- Participated in a Capture The Flag (CTF) cybersecurity competition, solving challenges in cryptography, web security, and forensics.
- Attended workshops on artificial intelligence, generative AI, and emerging technologies in industry and research.
- Gained hands-on experience using GitHub Copilot and AI tools to build applications and explore AI-assisted development.
